DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, and 30-36, are drawn to digital identity device for identifying legal entities, classified in class 713, subclass 184.
- II. Claims 10-29 and 37-50, are drawn to licensing, classified in class 705, subclass 59.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as device which produces personal identification. In the instance case, invention II has separate utility such as determining that an outside entity has authorization to use the selection See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
